ABOUT ME

Information Technology graduate, Cum Laude, with hands-on experience in backend programming, database development, web applications, SAP ABAP, and AI automation. Skilled in Java, JavaScript, PHP, MySQL, SQL, and SAP ABAP, with experience in building database-driven applications, implementing CRUD operations, troubleshooting technical issues, analyzing requirements, and presenting solutions. Knowledgeable in AI-powered automation, workflow optimization, data entry, and administrative support, with a strong ability to learn new tools and technologies. Aspiring Virtual Assistant specializing in General Virtual Assistance, Executive Assistance, Data Entry, and AI Automation, combining technical expertise with strong organization, problem-solving, and attention to detail.

PROFESSIONAL EXPERIENCE

Accenture (On the Job Training) (Remote)| February 2026 - June 2026

SAP ABAP Developer Trainee

- Completed hands-on training in SAP ABAP Development and SAP Administration within an enterprise environment.
- Developed and practiced ABAP programming concepts, including working with SAP GUI and function modules.
- Gained practical exposure to SAP system support, configuration, and enterprise business processes.
- Analyzed real-world business and technical scenarios and developed solutions based on the given requirements.
- Presented and defended technical solutions and case studies to IT professionals, strengthening technical communication, analytical thinking, and problem-solving skills.

EDUCATION

STI College Global City | 2022 - 2026

Bachelor of Science Information Technology - Cum Laude

Graduated with Latin Honors (Cum Laude) with academic and practical experience in software development, database management, systems analysis, networking, and information technology.

PERSONAL PROJECTS

A Web-based Hospital Patient Queuing and Management System (2024)

PHP | MySQL | HTML | CSS | Javascript | Visual Studio Code | XAMPP

- Developed a web-based application for managing patient records, appointments, user access, and queuing operations.
- Implemented database functionality for storing and retrieving patient and appointment information.
- Designed a responsive interface to help users efficiently manage patient information and monitor the queue.
- Applied backend and database concepts to support organized patient management and streamline the overall workflow.

Elysium Frontier: A Web3 MMORPG (2025)

JavaScript | Unity | C# | Supabase | NoSQL | Git | Blockchain Concepts

- Developed a web-deployed MMORPG featuring player progression, quests, inventory, combat, and in-game economy systems.
- Utilized JavaScript to support web-based functionality and system interactions within the application.
- Implemented gameplay mechanics and system interactions using Unity and C#.
- Integrated Supabase and NoSQL database technologies to support game-related data and player information.
- Explored blockchain concepts for integrating digital assets and game-based token systems.

Facebook Page Chat Support Automation - RAG-Based Customer Support (2026)

n8n | Facebook | AI Automation | RAG | OpenAI | Google Docs | Webhooks | HTTP Requests

- Built an AI-powered Facebook Page support workflow that captures, processes, and responds to customer inquiries using a business-specific knowledge base.
- Implemented Retrieval-Augmented Generation (RAG) to provide accurate, context-aware responses based on approved business information.
- Automated conversation routing by escalating inquiries to a human agent when the AI could not confidently provide an answer.
- Reduced repetitive customer support tasks, improved response speed and consistency, and enabled customer assistance beyond regular business hours while maintaining human oversight.

PERSONAL PROJECTS CONTINUED

Appointment Booking Automation (2026)

n8n | Automation | Gmail | OpenAI | Google Forms | Google Calendar | Google Sheets | JavaScript

- Developed an automated appointment booking workflow that processes customer requests and checks Google Calendar availability in real time.
- Automated appointment confirmation and rejection based on available time slots, eliminating repetitive manual scheduling tasks.
- Integrated Gmail notifications and Google Sheets tracking to maintain organized records of booking requests and statuses.
- Helped prevent double bookings, reduce administrative workload, and streamline the overall appointment scheduling process.

AI-Powered Email Triage & Drafting Automation (2026)

n8n | AI Automation | Gmail | OpenAI | JavaScript

- Built an AI-powered Gmail workflow that automatically analyzes incoming emails and categorizes them by priority and required action.
- Implemented automated labeling for URGENT, CEO ACTION, FOLLOW UP, and FYI emails to improve inbox organization and prioritization.
- Developed an AI agent that generates context-aware email drafts aligned with the executive's preferred communication style.
- Maintained human-in-the-loop approval by saving drafts in Gmail instead of sending automatically, improving response efficiency while preserving control and accuracy.

Email & Calendar Management (2026)

Gmail | Google Calendar | Email Management | Scheduling | Administrative Support

- Managed and organized email inboxes by categorizing messages, prioritizing urgent requests, identifying follow-ups, and maintaining clear communication records.
- Coordinated appointments and meetings by reviewing availability, scheduling events, sending invitations, and updating calendar details as needed.
- Monitored upcoming meetings, deadlines, and follow-up tasks to help maintain an organized and efficient daily schedule.
- Streamlined routine administrative tasks by maintaining accurate email and calendar records, reducing scheduling conflicts, and ensuring important requests and commitments were properly tracked.

TECHNICAL & VIRTUAL ASSISTANCE SKILLS

- **AI & Automation:** n8n, ChatGPT, Claude, Google Gemini, Grok, AI Workflow Automation, RAG (Retrieval-Augmented Generation), Webhooks, HTTP Requests.
- **Virtual Assistance & Productivity:** Gmail, Google Calendar, Google Sheets, Google Docs, Google Forms, Email Management, Calendar Management, Appointment Scheduling, Data Entry, Administrative Support.
- **Content & Creative Tools:** Canva, CapCut, Figma, Basic Graphic Design, Short-Form Video Editing, Content Preparation.
- **Web Development:** HTML, CSS, JavaScript, PHP.
- **Programming:** Java, Python, C#, SAP ABAP.
- **Database & Backend:** MySQL, NoSQL, Supabase.
- **Development & Enterprise Tools:** Git, Visual Studio Code, Eclipse, SAP GUI, Unity, Blender.
- **Other Technical Skills:** Debugging & Troubleshooting, Workflow Optimization, 2D/3D Game Development, Game Mechanics Design.

SOFT SKILLS

- Organization & Time Management
- Attention to Detail
- Problem-Solving
- Critical & Analytical Thinking
- Willingness to Learn
- Communication
- Task Prioritization
- Reliability & Accountability
- Initiative & Self-Management

CERTIFICATIONS & TRAININGS

- SAP ABAP Developer Training - Accenture (2026)
- Network Technology Fundamentals - STI (2024)
- System Administration - STI (2023)
- JAVA Fundamentals - STI (2022)
